Software developer with experience in start-up businesses and analytics

SUMMARY

Customer support representative at Awardco, with backend web development experience at early-stage companies. Designed data structures, built and secured APIs, and integrated third-party services, with additional work in analytics. Completing a B.S. in Information Management at Utah Valley University.

EXPERIENCE

Customer Support Representative

Present

Awardco

Morning Merchandise

Sep 2024 – 2026

Costco

Sep 2020 – Dec 2022

- Optimized merchandise sales by improving visibility and timing, using sales, product turnover, and managerial preferences.

Software Developer

Dec 2024 – Jun 2025

Refactor Technologies

- Developed web development skills through tutor-guided work.

Backend Software Developer

Jan 2023 – Jul 2024

Stutor

- Designed the core data structures for the Stutor application.
- Built and maintained frontend APIs with access controls and security measures.
- Integrated third-party services into the backend, including Mailchimp and Firebase.
- Loaded extracted college course catalogs into the application database.

Java / Software Development Certification

Sep 2021 – Apr 2022

Quality Assurance Certification

DevMountain · Student

- Built a puzzle-game site that uses hidden letters to test how well a new web developer understands a page.
- Studied quality assurance from planning through automated and manual testing to reporting.
